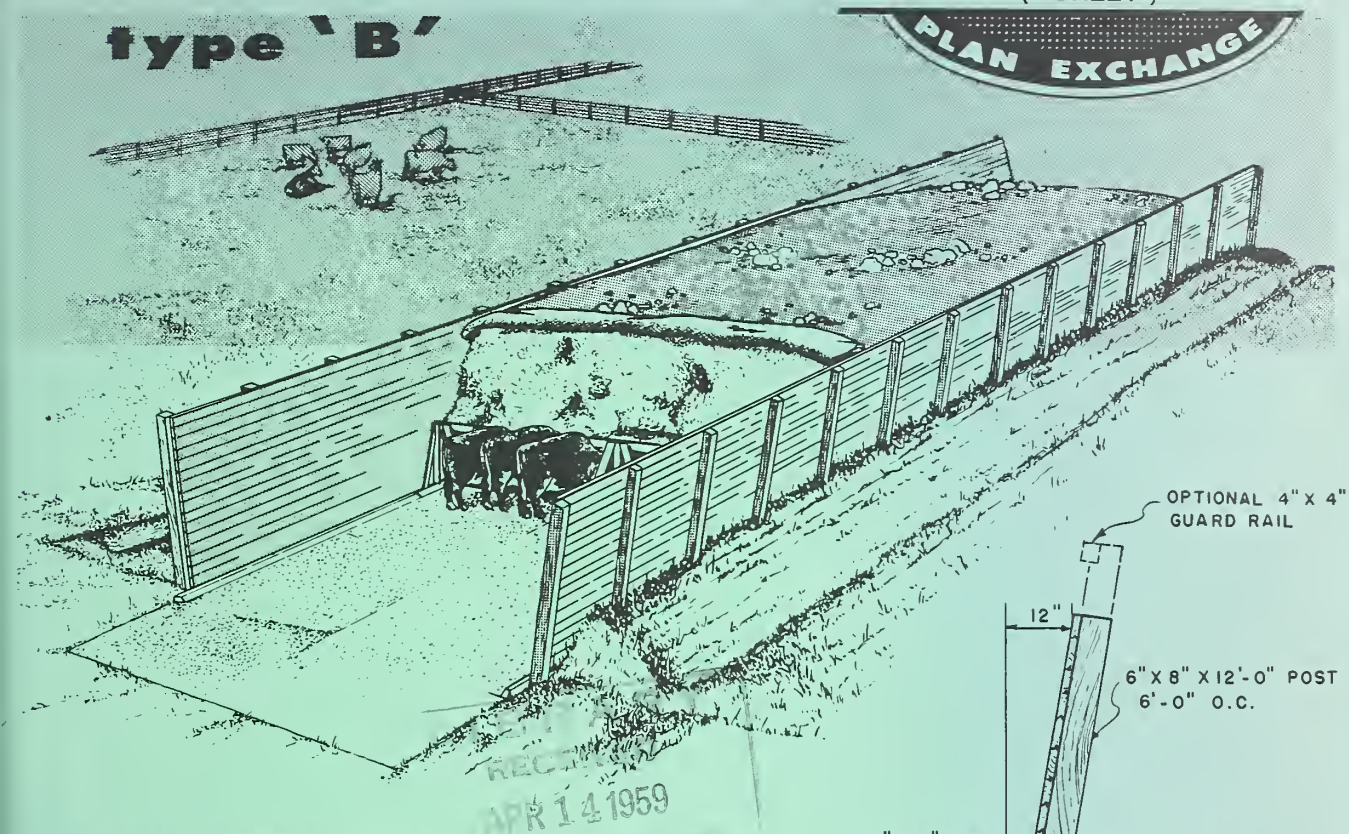
BUNKER SILO

type 'B'

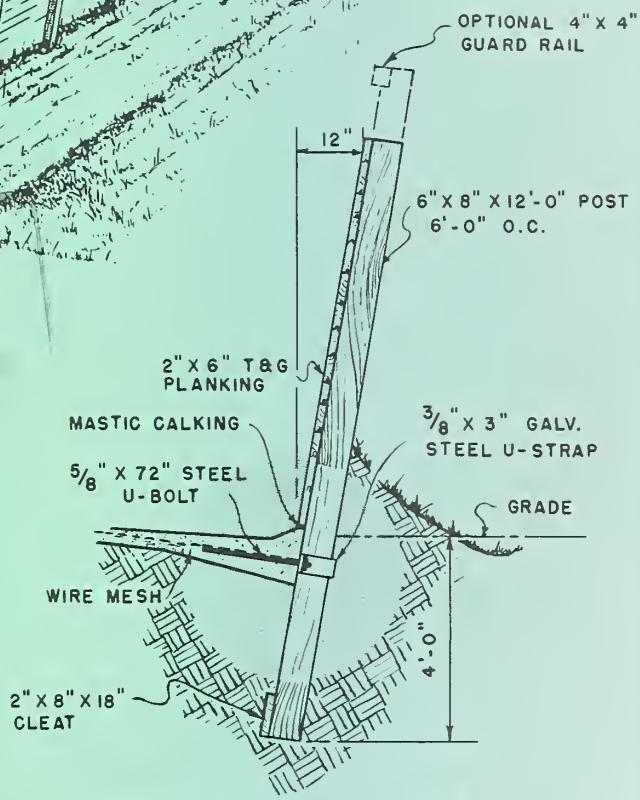
COOPERATIVE FARM BUILDING
PLAN NO. 5829
(1 SHEET)
PLAN EXCHANGE



RECEIVED
APR 14 1959

The pressure-treated wood sidewalls of this silo are anchored to the thickened edges of the 4-inch reinforced concrete slab. This construction is especially recommended for locations where loose or sandy soils will not provide firm support for the posts.

The working drawing includes a table of capacities for widths from 16 to 32 feet and lengths from 60 to 90 feet.



CROSS SECTION AT POST

Complete working drawings may be obtained through your county agent or from the extension agricultural engineer at most State agricultural colleges. There is usually a small charge.

ORDER PLAN NO. 5829
BUNKER SILO, TYPE "B"

If working drawings of this plan are not available in your State, write to the U.S. Department of Agriculture, Agricultural Engineering Research Division, Plant Industry Station, Beltsville, Md. The U.S. Department of Agriculture does not distribute drawings, but will direct you to a State that does distribute them.

Issued March 1959

For sale by the Superintendent of Documents, U. S. Government Printing Office
Washington 25, D. C. – Price 5 cents.
